DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-54, drawn to a target body classified in class 33, subclass 293.
- II. Claims 55-124, drawn to a method of obtaining a location of points on a vehicle with a target system, classified in class 700, subclass 279.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions group I and group II are related as process and apparatus for its practice. The inventions are distinct if it can be shown that either: (1) the process as claimed can be practiced by another materially different apparatus or by hand, or (2) the apparatus as claimed can be used to practice another and materially different process. (MPEP § 806.05(e)). In the instant case the method claimed could be performed using an apparatus that did not employ a target body as stated in Group I.

3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

4. Depending on applicant's election of the restriction requirement stated above, an election of species is required because this application further contains claims directed to the following patentably distinct species of the claimed invention:

Art Unit: 2859

06 a) If ~~the restriction shown in~~ group I is elected above, then an election of species is required between;

i. The species shown in Figs. 2, 3A-B, 4A-B, 5, 6A-B, 7A-B, 9A-B, 10A-B and 13.

ii. The species shown in Figs. 8, 10A and 11-13.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, none of the claims appear to be generic.

06 b) If ~~the restriction shown in~~ group II is elected above, then an election of species is required between;

i. The species/method of obtaining a location of a position on a vehicle as stated in claims 55-74.

ii. The species/method of measuring a body tilt angle of a vehicle as stated in claims 75-83.

iii. The species/method of measuring a perpendicular distance on a vehicle as stated in claims 84-95.

iv. The species/method of measuring ride height on a vehicle as stated in claim 96.

v. The species/method of obtaining a toe curve for a wheel on a vehicle as stated in claims 97-113.

Art Unit: 2859

- vi. The species/method of measuring alignment of a body of a vehicle as stated in claims 114-124.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, none of the claims appear to be generic.

5. Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

6. A telephone call was made to Mr. Scott D. Paul on June 20, 2002 to request an oral

Art Unit: 2859

election to the above restriction requirement, but did not result in an election being made.

7. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

8. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Tania Courson whose telephone number is (703) 305-3031. The examiner can normally be reached on Monday-Friday from 8:00AM to 4:30PM.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Diego Gutierrez, can be reached on (703) 308-3875. The fax number for this Organization where this application or proceeding is assigned is (703) 308-7724.

Any inquiry of a general nature or relating to the status of this application or proceeding should be directed to the receptionist whose telephone number is (703) 308-0956.
